1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A. Accounting Practices

The financial statements of the Berkley Insurance Company (the “Company”) are presented on the basis of accounting practices prescribed or permitted by the Delaware Insurance Department.

The Delaware Insurance Department recognizes only statutory accounting practices prescribed or permitted by the state of Delaware for determining and reporting the financial condition and results of operations of an insurance company, and for determining solvency under the Delaware Insurance Law. The National Association of Insurance Commissioners (NAIC) Accounting Practices and Procedures manual (NAIC SAP), has been adopted as a component of prescribed or permitted practices by the state of Delaware. The Delaware Insurance Commissioner has the right to permit other specific practices that deviate from prescribed NAIC accounting practices and procedures.

The Delaware Commissioner of Insurance has allowed the Company permitted practices that differ from NAIC SAP. The permitted practices include:

The Company discounts non-tabular workers’ compensation loss reserves. NAIC SAP only allows the discounting of tabular reserves.

A reconciliation of the Company’s net income and capital surplus between NAIC SAP and practices prescribed and permitted by the state of Delaware (“DE”) is shown below:

	SSAP #	F/S Page	F/S Line	12/31/2020	12/31/2019

(6) State Prescribed Practices (Surplus)					-
(7) State Permitted Practices (Surplus)	65	3	1	(200,035,844)	(267,956,515)
(8) Statutory Surplus, NAIC SAP	XXX	XXX	XXX	\$ 5,988,084,820	\$ 5,745,105,473

The Company entered into an intercompany reinsurance pooling agreement (Pooling Agreement) with twenty of its U.S. property and casualty insurance subsidiaries (Pool Affiliates), effective January 1, 2013 (see note 26). Under the Pooling Agreement, the Pool Affiliates agreed to cede and transfer to the Company and the Company agreed to assume and accept as its own obligation (1) 100% of the Pool Affiliates’ respective liabilities on all insurance policies and all assumed reinsurance contracts that were in force as of January 1, 2013, or that had expired or had been terminated or non-renewed as of January 1, 2013; and (2) 100% of the Pool Affiliates’ respective liabilities on all insurance policies and all assumed reinsurance contracts issued subsequent to January 1, 2013.

In addition, effective January 1, 2013, three other insurance subsidiaries and Union Standard Lloyd’s, an affiliated Lloyd’s entity, have in place separate 100% quota share reinsurance agreements with the Company (see note 26).

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policies

Premiums are earned over the terms of the related insurance policies and reinsurance contracts. Unearned premium reserves are established to cover the unexpired portion of premium written. Such reserves are computed by pro rata methods.

Expenses incurred in connection with acquiring new insurance business, including such acquisition costs as sales commissions, are charged to operations as incurred. Expenses incurred are reduced for ceding allowances received or receivable.

Net investment income earned consists primarily of interest and dividends less investment related expense. Interest is recognized on an accrual basis and dividends are recognized on an ex-dividend basis. Realized gains and losses on the sale of investments are calculated using the first-in, first-out method to determine the cost of securities sold or the specific identification method in other instances, and reflected in net income. Unrealized gains or losses due to changes in valuations of investments are credited or charged to unassigned surplus, except to the extent changes are considered other-than-temporary. Realized capital losses include write-downs for impairments considered to be other-than-temporary.

In addition, the Company uses the following accounting policies:

- (1) Investment grade short-term investments (NAIC Class 1-2) are stated at amortized cost using the scientific

ANNUAL STATEMENT FOR THE YEAR 2020 OF THE Berkley Insurance Company

interest method. Noninvestment grade short-term investments (NAIC 3-6) are stated at the lower of amortized cost or fair value. Such investments have original maturity dates less than one year. Cash equivalents consist of short-term, highly liquid investments with original maturities of three months or less.

- (2) Investment grade bonds (Class 1 and 2) are stated at amortized cost. Bonds that are defined by the NAIC as noninvestment grade (Class 3-6) are carried at the lower of amortized cost or NAIC fair value. Unit prices published by the Securities Valuation Office (SVO), if available, are used to calculate the fair value amount disclosed. In the absence of SVO published unit prices, quoted market prices by other third party organizations, if available, are used to calculate fair value. The amortized cost for bonds is calculated using the modified scientific interest method.
- (3) Common stocks, if any, other than investments in stocks of subsidiaries and affiliates are stated at fair value.
- (4) Investment grade redeemable preferred stocks, if any, are stated at amortized cost. Investment grade perpetual preferred stocks, if any, are stated at fair value. Noninvestment grade preferred stocks, if any, are stated at the lower of amortized cost or fair value.
- (5) Mortgage loans on real estate, if any, are stated at amortized cost, net of allowances for loan losses. Allowances for loan losses are recorded as an adjustment to surplus. Loans written-off are recorded as realized losses in net income.
- (6) Investment grade loan-backed securities are stated at amortized cost. The retrospective adjustment method is used to revalue all loan-backed securities for which the collection of all contractual payments is probable. The prospective adjustment method is used for periods subsequent to the recognition of an other-than-temporary impairment loss. Noninvestment grade loan-backed securities are stated at the lower of amortized cost or fair value.

Loan-backed and structured securities are amortized using the retrospective method, except for securities that have incurred a decline in fair value that is other-than-temporary which are amortized using the prospective method. The effective yield used to determine amortization is calculated based on actual historical and projected future cash flows, which are obtained from a widely-accepted securities data provider.

Loan-backed and structured securities that have a fair value less than amortized cost and for which the Company has either (1) the intent to sell, or (2) does not have the intent and ability to hold the security until recovery of its carrying value, the Company impairs the security to fair value and records an other-than-temporary impairment as a net realized capital loss. For securities where the Company does not expect to recover the amortized cost, but has the intent and ability to hold the security to recovery, the Company recognizes an other-than-temporary impairment for the credit related decline in value through realized capital losses.

When management has determined that a security is other-than-temporarily impaired because it is probable that all contractual cash flows will not be collected, the security is reported at fair value with the excess of contractual cash flows over expected cash flows recorded as a credit loss as a component of realized losses in the statutory statement of operations.

Realized gains or losses on the sale of investments are reflected in net income. The Company primarily uses first-in, first-out method to determine the cost of securities sold and the specific identification method in other instances.

- (7) Common stocks of wholly-owned insurance subsidiaries, if any, are carried at their audited statutory equity values promulgated by the states of domicile. Wholly-owned non-insurance subsidiaries are based on their audited GAAP equity. The Company owns 100% of the outstanding common stock of the following entities: Admiral Insurance Company (Admiral), Gemini Insurance Company, StarNet Insurance Company, Berkley Regional Insurance Company, Midwest Employers Casualty Company, Key Risk Insurance Company, Riverport Insurance Company, Berkley National Insurance Company, Berkley Life & Health Insurance Company, Preferred Employers Insurance Company, Great Divide Insurance Company, Intrepid Insurance Company and Berkley Assurance Company.

Investment in approximately 2.9% of its ultimate parent, W. R. Berkley Corporation (“WRB”), and other non-insurance subsidiaries are valued as described in the Purposes and Procedures Manual of the Securities Valuation Office of the NAIC (see Schedule D, Part 6, Section 1).

- (8) Investments in joint ventures and partnerships, if any, are carried on the basis of the underlying audited GAAP equity of the investee. Investments in unaudited limited liability companies, if any, are carried as non-admitted assets.
- (9) Investments in derivative securities, if any, are stated at fair value. The Company utilizes derivative instruments as part of its merger arbitrage activity conducted through investment management advisors. The Company invests in long portfolio positions, which are presented in the statutory statements of admitted assets, liabilities and capital and surplus as part of invested assets and carried at fair value with unrealized gains and losses reflected as an adjustment to surplus. Short sales and short options are reported as liabilities at fair value with unrealized gains and losses reflected as an adjustment to surplus.
- (10) The Company utilizes anticipated investment income as a factor in the premium deficiency calculation, in accordance with SSAP No. 53, Property-Casualty Contracts - Premiums.
- (11) Unpaid losses and loss adjustment expenses include an amount determined from individual case estimates and

ANNUAL STATEMENT FOR THE YEAR 2020 OF THE Berkley Insurance Company

loss reports and an amount, based on past experience, for losses incurred but not yet reported. Such liabilities are necessarily based on assumptions and estimates and while management believes the amount is adequate, the ultimate liability may be in excess of or less than the amount provided. The methods for making such estimates and for establishing the resulting liability is continually reviewed and any adjustments are reflected in the period determined.

(12) The Company has not modified its capitalizations policy from the prior period.

(13) The Company has no pharmaceutical rebate receivables.

D. Going Concern

Based upon its evaluation of relevant conditions and events, management does not have substantial doubt about the Company's ability to continue as a going concern.

There were no material changes in accounting principles or correction of errors during 2020 and 2019.

ANNUAL STATEMENT FOR THE YEAR 2020 OF THE Berkley Insurance Company

year. The following securities had other-than temporary impairments in prior years, as the present value of cash flows expected to be collected was less than the amortized cost:

CUSIP	Amortized Cost Before Current Period Other-Than Temporary Impairment	Projected Cash Flows	Recognized Other-Than-Temporary Impairment	Amortized Cost After Other-Than-Temporary Impairment	Fair Value	Date of financial statement where reported

- (5) Conclusions that Impairments are not Other-Than-Temporary - The Company has evaluated the loan backed securities in an unrealized loss position and believes that the unrealized losses are due primarily to temporary market and sector-related factors rather than to issuer-specific factors. None of these securities are delinquent or in default of financial covenants. Based on its assessment of the issuers, the Company expects them to continue to meet their contractual payment obligations as they become due and does not consider any of these securities to be other-than-temporarily impaired.

1. Market Risk, Credit Risk and Cash Requirements of the Derivative – Not applicable.
2. Objectives for Using Derivatives

The primary investment objective of the Company’s use of derivative financial instruments is risk arbitrage. That is, returns are generated from capturing the spread in value between a security’s current market value and its expected future value (calculated on the basis of an announced event; merger, privatization, restructuring). This future value may be defined in terms of cash or securities. In the case where the expected future value, as defined by the terms of the “event”, is given as multiple of another publicly traded security, the spread may only be captured by selling hedge against potential fluctuations in the price of the securities on hand. Due to many circumstances (illiquid stock market, uptick short sale regulations and competition for these same returns) it is not always possible or practical to sell the actual hedge security against the long position. In cases like this, options provide another vehicle to facilitate the desired returns. Additionally, in the case where cash is the defined proceed for the “event”, options on the same security when they exist, may also be used as a hedge.

The primary use of options is, as described herein, to hedge long positions of same or related securities that are involved in arbitrage of “event” situations. The premium typically associated with the option markets as well as defined time horizons (expirations) of option make these vehicle appropriate hedges for the uses for which the Company employs them. The overall philosophy of employing options is to define and limit risk.

3. The Company invested in long portfolio positions which are presented in the statutory statements of admitted assets, liabilities, capital and surplus as part of invested assets and are carried at fair value with unrealized gains and losses reflected as an adjustment to surplus. Long options were presented in other assets and were carried at fair value with unrealized gains and losses reflected as an adjustment to surplus. As of December 31, 2020 and 2019, the notional amount of long options outstanding was \$12,043,250 and \$15,522,750, respectively. As of December 31, 2020 and 2019, the notional amount of short options outstanding was \$3,167,250 and \$17,072,450, respectively.
4. 9. INCOME TAXES

The Tax Cuts and Jobs Act of 2017 (the “Tax Act”) was enacted on December 22, 2017. The Tax Act provided for a reduction of the U.S. corporate income tax rate from 35% to 21% effective January 1, 2018. The U.S. tax law requires insurance reserves to be discounted for tax purposes. The Tax Act modified this computation. The IRS issued revised discount factors to be applied to the 2017 reserves, which increased the beginning of the year 2018 deferred tax asset for loss reserve discounting by \$39.6 million. Under the related transition rule, a deferred tax liability of \$39.6 million was established which is being ratably amortized into taxable income over eight years beginning in 2018.

The Tax Act included a global intangible low-taxed income tax (“GILTI”). The Company has made an accounting policy election to treat any GILTI taxes as current period expense when incurred (the “period cost method”). The 2020 tax provision includes no current year GILTI tax expense and a GILTI tax benefit of \$3.6 million, resulting from a true up of the preceding year.

20. FAIR VALUE MEASUREMENTS

A. Inputs Used for Assets and Liabilities Measured at Fair Value on Recurring Basis

(1) Fair Value Measurements at Reporting Date

The estimated fair value of the Company’s financial instruments is generally based on values published by the SVO, bid quotations received from securities dealers, market appraisals and internal valuation based on relevant qualitative and quantitative financial information.

Included in various investment related line items in the financial statements are certain financial instruments carried at fair value. Other financial instruments are periodically measured at fair value, such as when impaired, or for certain bonds and preferred stock, when carried at the lower of amortized cost or fair value.

Fair value of an asset is defined as “the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The Company’s financial assets and liabilities carried at fair value have been classified, for disclosure purposes, based on a hierarchy defined by Statement of Statutory Accounting Principles No. 100, *Fair Value Measurements* (“SAP 100”). SAP 100 establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into three broad levels. Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date. Level 2 inputs are inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. Level 3 inputs are unobservable inputs for the asset or liability. Unobservable inputs may only be used to measure fair value to the extent that observable inputs are not available.

Because many fixed maturity securities do not trade on a daily basis, the Company utilizes pricing models and processes which may include benchmark curves, benchmarking of like securities, sector groupings and matrix pricing. Market inputs used to evaluate securities include benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, bids, offers and reference data. Quoted prices are often unavailable for recently issued securities, securities that are infrequently traded or securities that are only traded in private transactions. For publicly traded securities for which quoted prices are unavailable, the Company determines fair value based on independent broker quotations and other observable market data. For securities traded only in private negotiations, the Company determines fair value based primarily on the cost of such securities, which is adjusted to reflect prices of recent placements of securities of the same issuer, financial data, projections and business developments of the issuer and other relevant information.

The Company entered into an intercompany reinsurance Pooling Agreement with twenty of its U.S. property casualty insurance subsidiaries, effective January 1, 2013 (described in Notes 1 and 26 of the Financial Statements). In addition, effective January 1, 2013, three other insurance subsidiaries and Union Standard Lloyds, an affiliated Lloyd's entity, have in place separate 100% quota share reinsurance agreements with the Company. As a result of these agreements, the Company requested and received permission from the Delaware Commissioner to restate Schedule P historical information, effective with the year-end 2013 filing, as if these agreements were in place for all years reported. Furthermore, some additional restatements to the historical Schedule P data, involving reclassifications of certain data by line of business and by accident year, were made in 2015 in order to achieve consistent reporting.

Incurred losses and loss adjustment expenses attributable to insured events of prior years' increased by \$38 million during 2020 as a result of reexamination of unpaid losses and loss adjustment expenses. The prior years' unfavorable development was mainly driven by Other Liability – Occurrence, Other Liability – Claims Made and Reinsurance – Nonproportional Assumed Liability and was partially offset by Workers' Compensation.

Effective October 1, 2020 Berkley Insurance Company entered into a loss portfolio transfer agreement ("LPTA") with its affiliate W. R. Berkley Syndicate Management Limited, acting as agent for and on behalf of the members of Lloyd's Syndicate 1967 for business bound prior to October 1, 2020 ("WRBSML"), in which WRBSML will cede to BIC and BIC will reinsure 100% of COVID-19 Exposures arising under the Loss Portfolio (as defined in Section 1.1 of the LPTA) subject to and in accordance with the terms of the LPTA. As of December 31, 2020 BIC had recorded \$132.2 million of incurred COVID-19 losses under the LPTA, of which \$45.4 million were paid and \$86.8 million were case and IBNR reserves.

The ongoing COVID-19 global pandemic has impacted, and will likely continue to impact, the Company's results through its effect on claim frequency and severity. Loss cost trends have been impacted and will likely be further impacted by COVID-19 related claims in certain lines of business, as well as by other effects of COVID-19 associated with economic conditions, inflation, and social distancing and work from home rules, for example. Although it is still too early to determine the net impact, it appears that the losses incurred due to COVID-19 related claims are being

ANNUAL STATEMENT FOR THE YEAR 2020 OF THE Berkley Insurance Company

offset, to a certain extent, by lower claim frequency in certain lines of our businesses, including commercial auto, workers' compensation and other liability. However, given the continuing nature of the pandemic, the impact of COVID-19 could ultimately increase or decrease overall loss cost trends and is likely to have differing impacts on the Company's different lines of business. For certain casualty lines of business, the Company has received reported claims related to COVID-19, and it expects additional claims to be reported in the future. The Company has also received claims for other short-tailed lines related to business interruption and film production delays. Further, for workers' compensation, nearly two-thirds of the states have enacted rules, legislation or administrative orders creating a presumption that certain "essential" works who contract COVID-19 did so through the course of their employment. Several other states are considering similar actions, including with varying definitions of "essential" workers. While the ultimate impact of these presumptions are unknown at this time, the Company believes that such state actions will likely increase workers' compensation claims with respect to workers deemed "essential," although this impact may be partially offset by lower workers' compensation claim frequency with respect to non-essential workers.

The Company has estimated the potential COVID-19 impact to its workers' compensation, and other lines of business under a number of possible scenarios, however due to COVID-19's evolving impact and the still limited amount of available data, there remains a high degree of uncertainty around the Company's COVID-19 reserves. In addition, several states (and international jurisdictions), through regulation, legislation and/or judicial action, continue to seek to expand policy coverage terms beyond the policy's intended coverage, including, for example, but not limited to, property coverages, where there are attempts to extend business interruption coverage where there is no physical damage or loss to property, and attempts to disregard policy exclusions from communicable disease. Accordingly, losses arising from these actions, and the other factors described above, could exceed Company's reserves established for those related policies.

For the twelve months ended December 31, 2020, the Company has recognized losses for COVID-19-related claims activity, net of reinsurance, of approximately \$170 million.

32. DISCOUNTING OF LIABILITIES FOR UNPAID LOSSES OR UNPAID LOSS ADJUSTMENT EXPENSES

A. Tabular Discounts

Reserves for workers' compensation claims have been discounted on a tabular basis using the 1970 US Life Mortality Table at 2.5% and 3.3% as of December 31, 2020 and 2019 respectively. The discount rate used was based upon average asset portfolio yield and was approved by the Delaware Insurance Department. The amount of tabular discount as of December 31, 2020 and 2019 is \$178,535,806 and \$219,479,673, respectively. The amount of discount for case and IBNR reserves at December 31, 2020 is as follows:

ANNUAL STATEMENT FOR THE YEAR 2020 OF THE Berkley Insurance Company

Tabular Discount Included in Schedule P - Part 1

Schedule P lines of business	Case	IBNR	Total
Workers' compensation	\$ 13,030,854	\$ 821,551	\$ 13,852,405

The Company recognized \$50,218,236 of interest accretion in the Statement of Income for the current year related to tabular discount on page 3, line 2.

B. Non-Tabular Discounts

Workers' compensation unpaid losses have been discounted on a non-tabular basis using a rate of 2.5% and 3.3% as of December 31, 2020 and 2019, respectively. The discount rate used was based upon average asset portfolio yield and was approved by the Delaware Insurance Department. The amount of the discount as of December 31, 2020 and December 31, 2019 is \$200,035,844 and \$267,956,513, respectively. The amount of discount at December 31, 2020 for case and IBNR reserves is as follows:

Non Tabular Discount

Schedule P lines of business	Case	IBNR	Total
Workers' compensation	\$ 1,941,325	\$ 634,946	\$ 2,576,270
Excess workers' compensation	119,062,458	34,923,331	153,985,789

C. Changes in Discount Assumptions

The rate (2.5%) used to discount workers' compensation unpaid losses at December 31, 2020 has changed from the rate (3.3%) used at December 31, 2019, as approved by the Department. The amount of unpaid loss discount, excluding the current accident year, is \$163,706,787 and \$191,497,296 for Tabular reserves and Nontabular reserves, respectively. Had the applicable unpaid losses been discounted at the rate (3.3%) used at December 31, 2019, the amount of discount would have been \$200,039,373 and \$237,560,774 for Tabular and Nontabular reserves, respectively. The decrease in discount due to the change in rates aggregates \$82,396,065 for both tabular and non-tabular discounting.

33. ASBESTOS AND ENVIRONMENTAL RESERVES

A. Five-Year Rollforward of Asbestos Reserves, Direct, Assumed and Net

Effective January 1, 2013, the Company entered into an intercompany reinsurance pooling agreement (see Note 26) whereby the Company assumed 100% of the Pool Affiliates respective liabilities on all insurance policies and assumed reinsurance contracts that were in force as of January 1, 2013, including asbestos and environmental reserves. The paid losses below in the 2013 calendar year include amounts received as settlement of the assumed asbestos and environmental reserves.

The Company has some exposure to asbestos and environmental claims arising from the direct sale of general liability insurance and from claims arising from assumed business.

The Company establishes full case reserve for all reported asbestos claims. Reserves for losses incurred but not reported ("IBNR") include a provision for development of reserves on reported losses. The Company's IBNR reserves are established based on a review of a number of actuarial analyses including market share based estimates, average cost models, and multiplying payments by an industry average survival ratio. Reserves are established for loss adjustment expenses (LAE) associated with these case and IBNR loss reserves.

The Company's asbestos related losses for each of the five most recent calendar years were as follows:

ANNUAL STATEMENT FOR THE YEAR 2020 OF THE Berkley Insurance Company

7.2 (An extended statement may be attached.)

The Company entered into an intercompany reinsurance Pooling Agreement with twenty of its U.S. property casualty insurance subsidiaries, effective January 1, 2013 (described in Notes 1 and 26 of the Financial Statements). In addition, effective January 1, 2013, three other insurance subsidiaries and Union Standard Lloyds, an affiliated Lloyd's entity, have in place separate 100% quota share reinsurance agreements with the Company. As a result of these agreements, the Company requested and received permission from the Delaware Commissioner to restate Schedule P historical information, effective with the year-end 2013 filing, as if these agreements were in place for all years reported. Furthermore, some additional restatements to the historical Schedule P data, involving reclassifications of certain data by line of business and by accident year, were made in 2014 in order to achieve consistent reporting.

Using the net triangles in Schedule P Parts 2-4, without any adjustment, for the purpose of estimating ultimate claim liabilities could result in misleading conclusions, due to significant changes in the mix of business by subline, class and territory, among others, over the 10 year history, as a result of many new business units being started. This is particularly true for Workers Compensation, where the mix of primary and excess has changed significantly; Other Liability - Occurrence, where the mix of classes has changed significantly; and for Reinsurance - Nonproportional Assumed Liability, where the mix of excess workers compensation and other excess lines of business has changed significantly. Selected supplemental information, in schedule P format, is available for these three lines of business on the W.R. Berkley Corporation website (www.berkley.com) in the Financial Information section.
